Commissioner:

It is requested that the rejections of claims in the PTO action dated September 8, 2005 be reconsidered and withdrawn. This application has a single independent claim and the balance of the claims are dependent from it. All of the claims are for a reinforced amorphous metal object comprising a ductile metal phase in an amorphous metal matrix wherein the embedded phase is formed in situ in the matrix by crystallization from a molten alloy. Allowance of Claim 1 means that the balance of the claims are also allowable.
